

Mojtaba Mirzadeh

iOS Developer

An iOS Developer with more than 4 years of experience (more than 15 published applications and frameworks) leading the creation of complex, user-focused software applications at the highest level of quality and efficiency. I aim to create software with the user in mind, creating applications with a useable and intuitive user interface experience, mainly with Swift. I demonstrate strengths in adaptability, clear communication, and a relentless focus on the details that get projects shipped.

Skills

Work Experience

iOS Developer at MeetPal Inc

Location: California/United States (Remote)

Aug 2021 - Present (Full Time)

 <https://meetpal.app>

- Working with a well-experienced international iOS team of senior developers who use MVVM for software architecture and technologies such as UIKit, Testing, URLSession, Socket, etc.
- Publishing **1 application (MeetPal)** on AppStore.
- Optimize the codebase by using new architecture and refactoring auto layouts.
- Responsible for developing the app with other iOS developers.
- Collaborating with other team members, designers, backend teams, product owners, and testers to create new features and improve overall app quality.

iOS Team Advisor at Aranuma

Location: Tehran/Iran (Remote)

iOS Team Advisor

Oct 2021 - Sep 2022 (Hourly)
*20 Hours in a month

 <https://www.aranuma.com>

- Working with a young and highly motivated iOS team who uses MVVM for software architecture and technologies such as RxSwift, Socket, etc.
- Publishing **1 application (SmartPro)** in a local Iranian store.
- Supporting and mentoring our developers in using the best architecture and the latest and most suitable technologies. I also support our developers in learning and sharing knowledge with team members.
- Focusing on understanding and translating business requirements and technical specifications for the team.

iOS Developer at Kavoshgaran Hamrah Kish (GSS)

Location: Tehran/Iran (On-Site)

Feb 2018 - Aug 2021 (Full Time)

<http://hamrahkish.com>

- Worked with a well-experienced team of active iOS developers who used MVC and MVVM for software architecture and technologies such as UIKit, SwiftUI, Testing, URLSession, Alamofire, CoreData, etc.
- Published more than **7 applications** and **3 frameworks**
- Focused on technical specifications, concentrated on quality, deadlines, and deliverables with technical capability
- Shared knowledge and collaborated with other team members to create new features and applications.
